

TUFFASS M40 Low Profile

The M40 is suited to a range of uses. This includes spreading manure from dairy and pig farms, used on broad acre crops, plus sugar cane and tea tree operations.

The M40 is a durable, value for money vertical beater spreader. It is capable of spreading almost any kind of material.

The heavy duty floor chains feed into the heavy duty 8mm roller beaters. This lets the M40 spread many types of heavy material wet or dry. This includes organic matter, hay, mulch, compost and cane mill mud.

The rear beaters break up the material as it feeds, and broadcasts it from the rear of the machine. With heavy duty gearboxes as standard, the M40 is built to work hard yet require minimal horsepower to operate.

FEATURES:

- Floatation tires
- Road lights
- Heavy duty gearbox to drive the floor chains

OPTIONS AVAILABLE:

- The M40 is available from 4m³ to 7m³.
- Hydraulic brakes
- Hydraulic control door
