

# TUFFASS M60 Super Vertical Beater

## FEATURES:

- Floatation tires
- Road lights
- Rear hydraulic control door
- Heavy duty gearboxes

The heavy duty floor chains feed into the heavy duty 10mm roller beaters featuring bottom spreading plates. These plates ensure better spreading of fine materials like chicken litter, lime and gypsum.

This lets the M60 Super spread many types of heavy materials, wet or dry. This includes organic matter, hay, mulch, compost and cane mill mud.

The rear beaters break up the material as it feeds and broadcasts it from the rear of the machine.

With heavy duty gearboxes as standard, the M60 Super is built to work hard yet require minimal horsepower to operate.

## OPTIONS AVAILABLE:

- Hydraulic brakes
- The M60 is available from 5m<sup>3</sup> to 12m<sup>3</sup>.
