

TUFFASS PNQ 1500

The PNQ 1500 is a pendulum granular spreader, featuring a 1500L capacity stainless steel hopper.

The PNQ 1500 has a larger hopper than other pendulum spreaders on the market. For example, it is able to load a 1 tonne bag of urea.

The stainless steel pendulum action allows seed and granular fertiliser to be spread accurately for a range of uses.

The PNQ 1500 can also be fitted with a single-side stainless steel pendulum. This allows material to be spread along orchards, rows, and tree-lines.

OPTIONS AVAILABLE:

- Custom made vinyl cover
- Stainless steel pendulum able to spread single side
