

# TUFFASS PNX 500

The PNX 500 is a general purpose pendulum spreader. It is designed for smaller tractors and farms, featuring a 500L capacity stainless steel hopper.

The stainless steel pendulum action allows seed and granular fertiliser to be spread accurately for a variety of uses.

This 3-point linkage pendulum spreader features a 500kg capacity marine grade stainless steel hopper. With up to 14-16m spreading width.

The PNX 500 can also be fitted with a single-side stainless steel pendulum. This allows material to be spread along orchards, rows, and tree-lines.
