

TUFFASS POULTRY Litter Rejuvenator

The TUFFASS litter conditioners are the only machines in the world designed specifically to prepare and maintain bedding and litter for poultry including chickens, turkeys and ducks.

The Tuffass rejuvenators lift wet, hard, caked litter from the poultry shed floors then, crumbles, turns and aerates the material properly, helping to overcome nearly all problems associated with litter.

This keeps it soft, dry and healthy which greatly reduces the smell and harmful gasses during the entire growing cycle, while producing stronger healthier birds.

- These machines have been developed for over 20 years of continuous use and collaboration with poultry farmers and **over 10,000 units have been sold worldwide.**

FL4- Available now in 1.3mt or 1.7mt.- Heavy duty machine, Hot dipped galvanized construction for litter up to 200mm including wheat straw, shavings, rice hulls, sawdust and chips.
