

TUFFASS Uragano Range

The Uragano is a high capacity, heavy duty vertical beater spreader, designed for broadacre use. We believe it's the best value heavy duty spreader available on the Australian market for dairy or feedlot use today.

FEATURES:

- Road lights
- Rear door hydraulic door
- Removable beater section
- Heavy duty twin gearbox

OPTIONS AVAILABLE:

- The Uragano is available in sizes ranging from 12m³ to 30m³.

The heavy duty chain floor is designed to consistently feed bulky loads without slipping - even when wet.

The 16mm marine chain floor resists corrosion and reduces wear and tear. This is powered by an Italian made, heavy duty twin gearbox drive.

The floor feeds material into 16mm vertical beaters, twice the thickness of the standard. These high quality parts mean the Uragano can spread large loads efficiently.
